

$\Delta\nu/\nu$ vs. E for ^{240}Pu (total ν)

Ordinate scales are % relative standard deviation and nu-bar.

Abscissa scales are energy (eV).

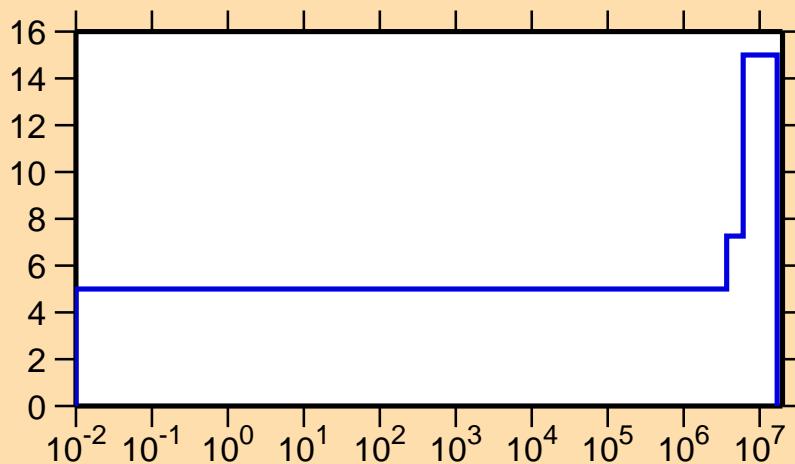

ν vs. E for ^{240}Pu (total ν)

Correlation Matrix

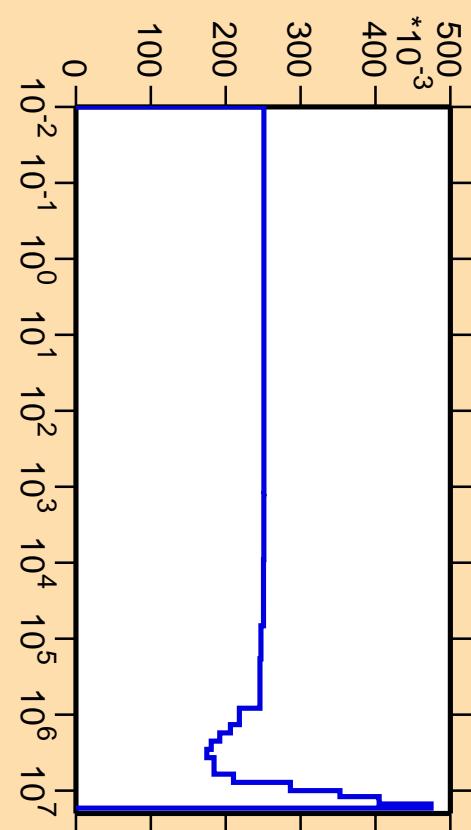

$\Delta\nu/\nu$ vs. E for ^{240}Pu (delayed ν)

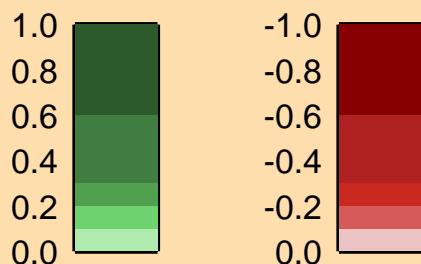

Ordinate scale is %
relative standard deviation.

Abscissa scales are energy (eV).

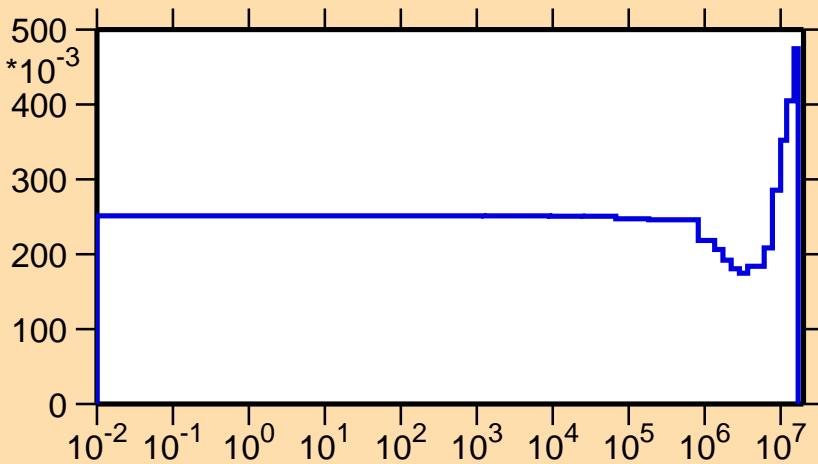

$\Delta\nu/\nu$ vs. E for ^{240}Pu (total ν)

Correlation Matrix

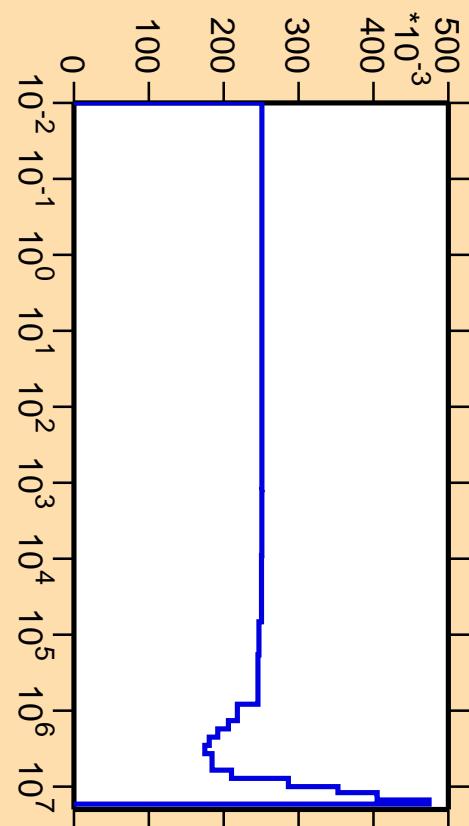

$\Delta\nu/\nu$ vs. E for ^{240}Pu (prompt ν)

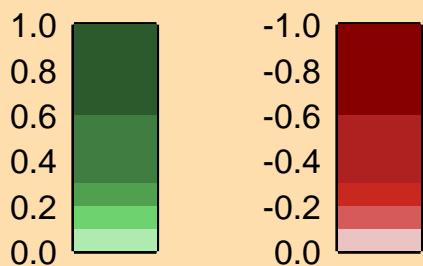

Ordinate scale is %
relative standard deviation.

Abscissa scales are energy (eV).

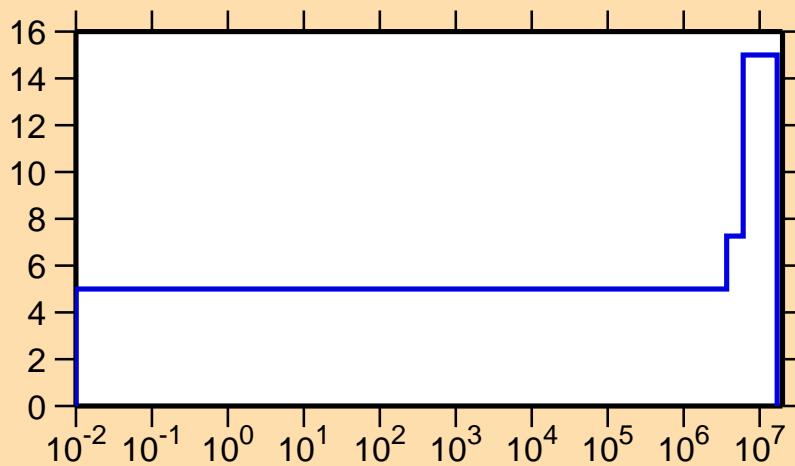

$\Delta\nu/\nu$ vs. E for ^{240}Pu (total ν)

Correlation Matrix

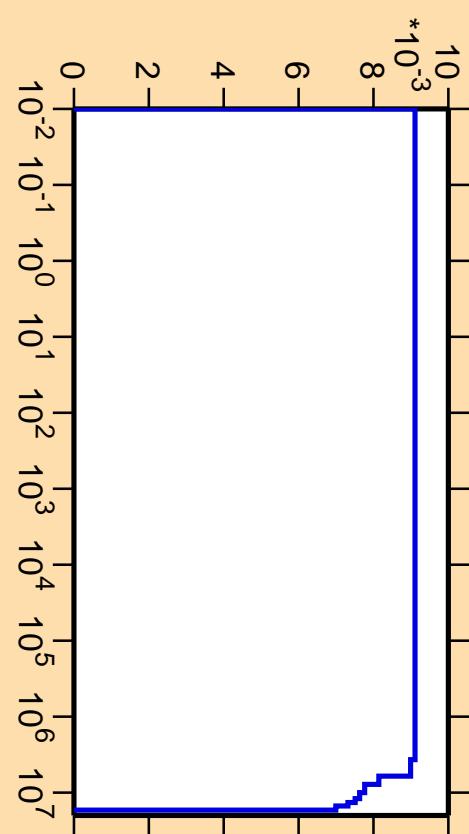

$\Delta\nu/\nu$ vs. E for ^{240}Pu (delayed ν)

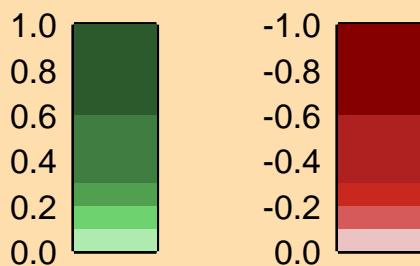

Ordinate scales are % relative standard deviation and nu-bar.

Abscissa scales are energy (eV).

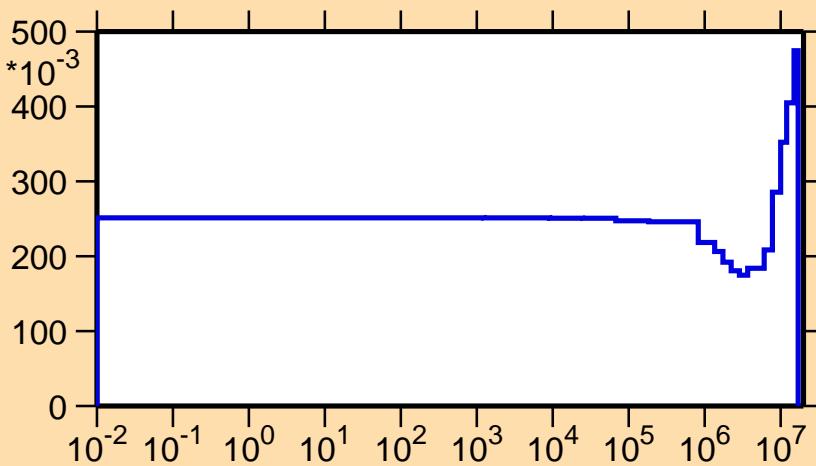

ν vs. E for ^{240}Pu (delayed ν)

Correlation Matrix

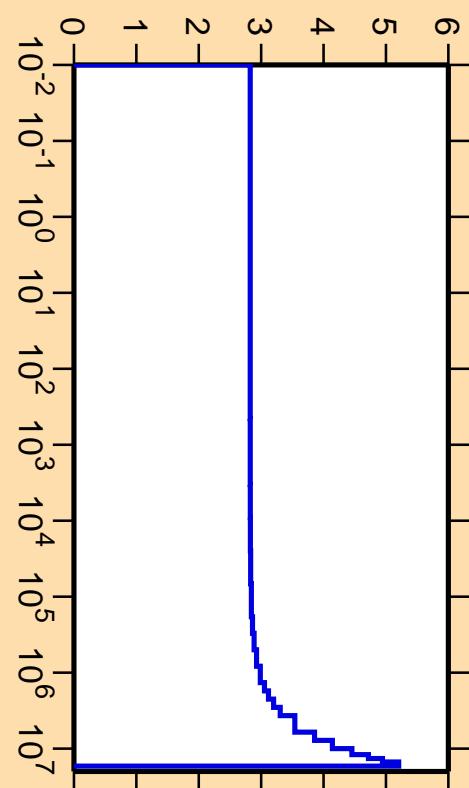

$\Delta\nu/\nu$ vs. E for ^{240}Pu (prompt ν)

Ordinate scales are % relative standard deviation and nu-bar.

Abscissa scales are energy (eV).

ν vs. E for ^{240}Pu (prompt ν)

Correlation Matrix
